BassX Dual Series

SpeakerCraft BassX Dual 8 and Dual 6 floor standing subwoofers incorporate two long throw woofers, which deliver the deepest possible bass response, while utilizing the smallest cabinets possible. These high power subwoofers boast 150 watt and 250 watt robust amplifiers. Each subwoofer is designed for huge bass response, while requiring the least amount of floor space, easy system setup and flexibility. They feature line level inputs to connect to most any receiver or preamp, a continuously variable low pass crossover so you can adjust the subwoofer to match the bass response of your main speakers, and an adjustable phase switch. Each model is equipped with a fixed high-pass crossover circuit to cut off the bass to the front (main) speakers so the upper bass will not overlap, thereby avoiding booming.

BassX Dual 8

- Built-In 250 Watt Amplifier
- Dual 8" Long Throw Woofers
- Auto Power On/Off
- Controls Include: Volume, Low Pass Crossover, Bass Boost and Phase
