AIM Monitor
Series

It's Ingenuity That Makes The Difference

Based on SpeakerCraft's most popular in-wall and in-ceiling speakers, the AIM™ Monitor Series takes the legendary SpeakerCraft performance out of the wall and onto the shelf. While an ideal system has all loudspeakers located in the wall or ceiling, applications sometime demand a shelf-mounted speaker. The AIM™ Monitor Series fills that need.

The series consists of five models. Each model is designed to sonically match with SpeakerCraft's AIM™, MT or CRS series of speakers. AIM™ Monitor One is a two-way speaker based on our MT6 One in-wall and CRS6 One in-ceiling speakers. The matching AIM™ Monitor One LCR is designed for use as a left, center, or right channel speaker in home theater applications. At the premium end of the line, the matching AIM™ Monitor Three and Monitor Three LCR models are based on the SpeakerCraft MT6 Three in-wall and CRS6 Three in-ceiling speakers. The AIM™ Monitor Four LCR matches our AIM8 Five, MT8 Four and CRS8 Four models, and is ideal for high powered systems that demand clean high fidelity output while being driven hard.

All speakers are custom finished in a black ash cabinet and are fully shielded for use in close proximity to televisions. Mix and match with SpeakerCraft in-wall or in-ceiling models and get seamless integration, ideal for high performance home theater systems.

You can depend on SpeakerCraft... We've manufactured millions of custom installation products and pledge that every product we build will give you the highest level of workmanship and sound performance. Our commitment to quality is matched only by our warranty... **Lifetime!**

Uni-Pivot

The LCR models utilize SpeakerCraft's exclusive Uni-Pivot technology to direct the critical mid and high frequencies to the listener. No longer are listeners limited by the placement of the cabinet. The Uni-Pivot is a self contained module that can be aimed, independent of the cabinet position, towards the listening area.

AIM™ Monitor Four LCR

- Left, Center, Right, Cabinet Speaker
- 2 Each 8" Aluminum/Magnesium Woofer
- 1" Aluminum/Magnesium Dome Uni-Pivot Tweeter
