

SpeakerCraft®

12 Channel Amplifiers

When SpeakerCraft set out to develop the custom installation industry's most complete line of amplifiers, we knew we had to have answers for the variety of situations that you encounter. At the SpeakerCraft Technical Training Institute in Riverside, California, our engineers and A/V dealers teamed up to design the Big Bang line of amplifiers. We took our dealer's input seriously, then went to work making their wish list a reality (thanks for the help). The Big Bang series is a highly reliable line of amplifiers that offers a solution for every installation with a variety of power, performance and price points.

BB1265

- AMP12065: BB1265 Shelf Top
- AMP12065-R: BB1265 w/ Rack Mount
- 65 Watts Per Channel RMS @ .05% THD \pm 3dB
- 5U High
- Independent Level Controls for Each Channel
- Each Channel Can Be Assigned to a Common Left, Common Right, Mono, or a Dedicated Input
- Adjoining Channels are Bridgeable
- Remote Power-on Switching Via Signal Sensing or 3-30V Trigger
- Separate Protection Circuitry for Each Channel
- 12V Control Output for Switching Auxiliary Devices On and Off
- Pass Through Output Allows Daisy-Chaining of Multiple Amplifiers
- 5-Way Binding Posts

BB1235

- AMP12035: BB1235 Shelf Top
- AMP12035-R: BB1235 w/ Rack Mount
- 35 Watts Per Channel
- 4U High
- Independent Level Controls for Each Channel
- Remote Power-on Switching Via Signal Sensing or 3-30V Trigger
- 12V Control Output for Switching Auxiliary Devices On and Off
- Pass Through Output Allows Daisy-Chaining of Multiple Amplifiers
- 5-Way Binding Posts

* All Amplifiers come with Limited TWO Year Warranty

* As we incorporate design improvements, specifications may change without notice
